

Minutes- Group Project

SEM5640

October 16, 2015

1 Minutes - 16/10/15

Attendees: CH, HH, DM, SJ, CG, NT

1.1 QA Session

- DFR2 - Prepare code for dynamically adding categories, though do not need this on the user interface. Add some flexibility for extension. Walking, running, cycling the most important.
- DFR2 - Assuming number values, but check data accessed through data sources first.
- DFR4 - Check rate limits to pull data, make option to refresh individual. Allow system to read from a .ini?
- DFR6 - Only for POST, not for sending data out
- DFR8 - Who user was, when it was, comment from admin why action was taken. Treat as a raw delete, no rollback function required.
- DFR9 - Roles permissible actions
 - Users can see their own data, and others status, basic data outside of group(When created, user name, basic data), summary of data (weekly etc.) for in group. Hide name upon user request, anonymous.
 - Coordinator can see overall data
 - Admin- everything
 - Community should not have access to details or user names of other users in different communities.
- CFR4 - Gather in information, send results notification to email. Show on forms when logging back in. Use nicknames as anonymous for showing other group or university emails.
 - Have extra results for best walkers etc.

1.2 Action points:

- Research data types coming from FitBit and Jawbone

1.3 Next meeting
